

MPOWR V5: New Features

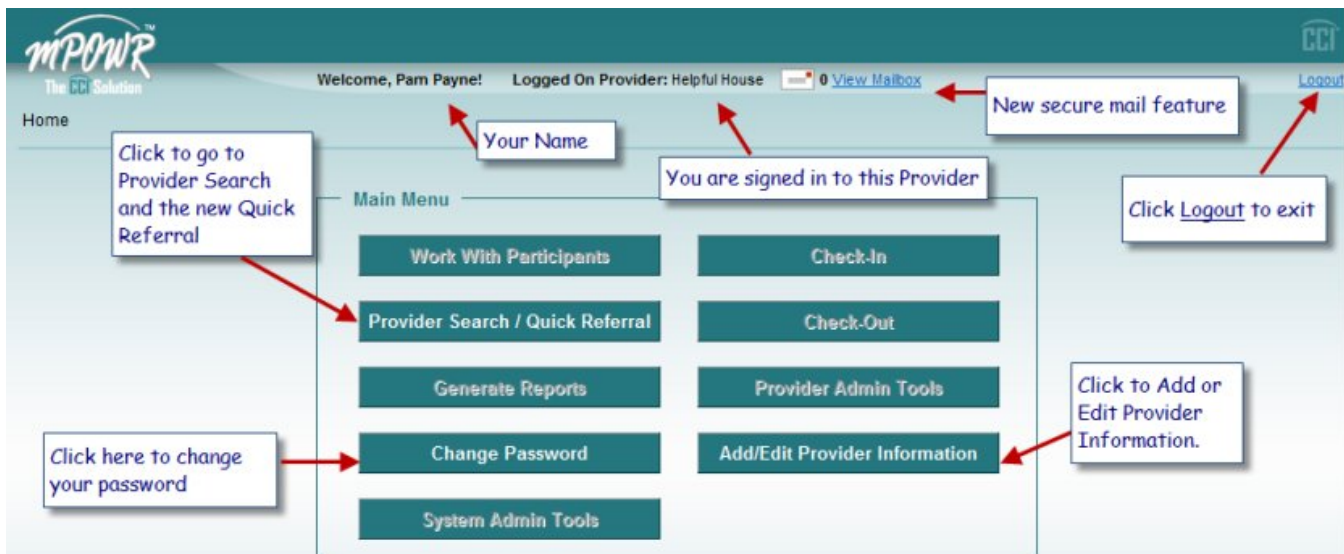

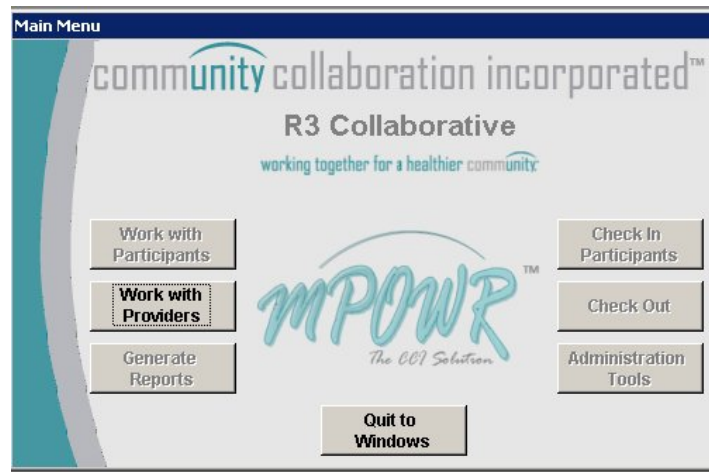

Provider Search Module

- 1) Ability to add keywords to the search of a provider in the Search by Services tab. This will allow more refined searches when seeking a specific need.
- 2) Quick referrals for those not being case managed. The case manager/user will be able to search, select, and print a referral sheet.

Messaging

This feature will allow secure messaging within MPOWR. There are three levels of messaging: Continuum level which is accessible by the system administrators, Provider level which is accessible by the Provider Administrator or Security Administrator, and the user level accessible by all users. This feature will be extremely valuable when users need to communicate privately since all emails are within the security of the application.
